

*Superior yields . . . season after season.*

# WB-STOUT **NEW**

WB-Stout is a hard red winter wheat WestBred licensed to AGSECO. 2010 marks the introduction of WB-Stout to farmers across the High Plains. It is broadly adapted east to west in Kansas, where its performance has been outstanding. AGSECO is particularly excited about WB-Stout's performance in the west. It offers an excellent package of disease resistance along with outstanding yield potential. In eastern Kansas, in years in which excessive rainfall occurs at or near harvest, test weights may become an issue.

## Characteristics

Plant Height	Medium
Maturity	Early
Shattering	Mod. Resistant
Straw Strength	Good
Test Weight	Below Average
Winterhardiness	Very Good
Acid Soil Tolerance	Mod. Resistant
Coleoptile Length	Med. Long
Grazing Potential	Good
Milling & Baking Quality	Excellent
Protein	Very Good

## Disease & Insects

Barley Yellow Dwarf	Mod. Susceptible
Hessian Fly	Susceptible
Russian Aphid	Susceptible
Leaf Rust	Resistant
Powdery Mildew	Mod. Susceptible
Speckled Leaf Blotch	Resistant
Soil Borne Mosaic	Resistant
Spindle Streak Mosaic	Resistant
Stem Rust	Resistant
Stripe Rust	Mod. Resistant
Tan Spot	Mod. Resistant
Wheat Streak Mosaic	Mod. Resistant

Pedigree: KS94U275/G1878//Jagger.

PVPA Status: Pending.
