

WINTERHAWK

Winterhawk, a WestBred variety, was licensed to AGSECO in 2007. This is an exceptionally high yielding hard red winter variety with good test weight. Winterhawk emerges well and covers the ground quickly in the fall. It has a high tillering capacity, along with very good drought tolerance. It has demonstrated very good foliar disease resistance, particularly to leaf rust and stripe rust. Winterhawk is broadly adapted to the wheat producing areas of southern Nebraska, all of Kansas, eastern Colorado, and northern Oklahoma.

Characteristics

Plant Height	Medium Tall
Maturity	Medium
Coleoptile Length	Medium
Seed Size	Large
Straw Strength	Good
Test Weight	Very Good
Winterhardiness	Good
Milling & Baking	Acceptable
Yield Potential	Good
Grazing Potential	Good

Disease & Insects

Barley Yellow Dwarf	Mod. Susceptible
Hessian Fly	Susceptible
Powdery Mildew	Mod. Susceptible
Leaf Rust	Resistant
Septoria Leaf Blotch	Mod. Susceptible
Spindle Streak Mosaic	Resistant
Soil Borne Mosaic	Resistant
Stripe Rust	Resistant
Tan Spot	Mod. Susceptible
Wheat Streak Mosaic	Mod. Resistant

Pedigree: Pioneer Experimentals

PVPA Status: Protected, must be sold only as a class of certified seed.

Winterhawk was developed by Westbred Breeders and marketed by AGSECO.
